Class X, CBSE Board, 2016 **CGPA- 8.6/10**

INTERSHIP EXPERIENCE

TXON— Web Developer Internship **March 2023 -Present**
Developing the websites using HTML, CSS, JavaScript, and deploy the site to the server. I work on completing the particular tasks with a team to create visually appealing and functional websites. In this internship, I am learning about advance web development and learning about the modern JavaScript, Git & Github and other technologies.

ACADEMIC / PERSONAL PROJECTS

- **CAR STORE SYSTEM**: - **Website Application**

This website was created to provide car rental services to the user in which they could rent car and purchase it after using it, and also to simplify the process of renting a car by eliminating the need for them to visit a dealership in person. I designed the website using HTML, CSS, JavaScript, and MySQL database.

- **YOLO-CAFE:-Website**

This system's goal is to assist cafe managers in running their business while also making it easier for consumers to place orders and get it delivered to their home. I developed the website with the help of JavaScript, and MySQL database.

- **KNOW YOUR WEATHER**: - **Web Application**

I created a weather application using APIs, JavaScript, Node.js and Express.js where users can find the weather information of any city with the help of an API service.

TECHNICAL SKILLS

Programming languages/Skills: JavaScript, Node.js, Express.js, HTML, CSS, C, C++, Core Java, Pug.js.
Database: MongoDb and MySQL.
Other Software/Tools: - Visual Studio, Github, Premiere Pro and Replit.

EXTRA-CURRICULAR

- Conducted college technical fest workshop and event during my 1st semester.

- I used to teach HTML, CSS, C, and C++ at Teacher On. Online platform where you can find local tutor, online teachers, and teachers to help with tutoring.
- Captain of the college tech hunt fest team during my 8th semester.
- Coordinator of Zee media event for student's registration and audition.
